

HAYSTACK®

MEDAL™

MOBILE ELITE DISCOVERY AND ANALYSIS LAB

ILTACON

August 23-27, 2026

Meet Your Presenter

John Wilson

*Chief Information Security Officer and President of Forensics,
HaystackID*

As Chief Information Security Officer and President of Forensics at HaystackID, John Wilson provides consulting and forensic services to help companies address various matters related to electronic discovery and computer forensics, including leading forensic investigations, cryptocurrency investigations, and ensuring proper preservation of evidence items and the chain of custody. He regularly develops forensic workflows and processes for clients ranging from major financial institutions to governmental departments, including Fortune 500 companies and Am Law 100 law firms.

Why Now?

THE DECISIVE EVIDENCE LIVES ON THE PHONE.

- ✓ Mobile is where the case now turns, and it is the hardest evidence to handle defensibly.
- ✓ A screenshot does not survive cross-examination. An in-house IT copy breaks the chain of custody.
- ✓ Message metadata, thread reconstruction, time zone normalization, and encrypted-app content all have to hold up at trial.

The Product

PRODUCTIZED MOBILE FORENSICS, FROM TRIAGE TO THE COURTROOM.

1

Forensically defensible
acquisition, analysis,
and expert testimony
for iOS and Android.

2

One forensic bench,
from first triage
through trial.

3

A service, not a tool.

4

Built for regulated
industries and high-stakes
litigation.

How It Works

ACQUIRE. ANALYZE. MOVE TO REVIEW. TESTIFY.

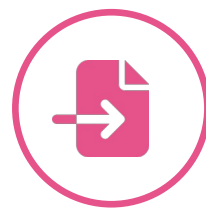

ACQUIRE

Forensic acquisition of iOS and Android, chain of custody preserved at every step.

ANALYZE

Messages, app data, call and location history, and cloud-sync artifacts, reconstructed defensibly.

MOVE TO REVIEW

A direct import into Relativity, with no separate processing-and-staging step.

TESTIFY

An examiner who can stand behind the findings in a deposition and at trial.

The Suite

ONE SUITE, THREE TIERS.

01

VANGUARD

Fast, privacy-first remote triage and preservation, typical deployment in 24 to 72 hours.

02

PRECISION

Targeted, deeper analysis and authentication for a litigation-bound matter.

03

RELAY

The enterprise mobile-to-Relativity pipeline for high device counts.

Relay

ONE CUSTODY CHAIN, ACQUISITION TO REVIEW.

Most mobile evidence takes a separate processing-and-staging step to reach the review platform. Every handoff is a place where custody can be challenged. Relay imports mobile evidence directly into Relativity, on one unbroken chain of custody. The result is a defensibility argument first, and a faster path to review second.

THE USUAL PATH, HANDOFFS STACK UP

RELAY, ONE UNBROKEN CHAIN OF CUSTODY

Defensibility

FORENSIC-GRADE, NOT AN IT COPY.

A screenshot or an IT export is not evidence. It can be altered, and it carries no defensible chain of custody.

MEDAL preserves custody at every step, so the artifact holds up under an authenticity challenge.

The same discipline runs across HaystackID's established forensic work.

Testimony

AN EXPERT WHO CAN TESTIFY AT EVERY TIER.

HaystackID's expert bench is recognized by industry leaders, including Chambers.

Testimony-grade at every tier, not just the top one.

Who It Is For

BUILT FOR THE TEAMS THAT LIVE IN THE EVIDENCE.

Litigation Counsel

Plaintiff and defense, taking mobile evidence to trial.

Corporate Legal and GC

BYOD or mobile-heavy workforces and large device counts.

Investigations and IR

Including departing-employee matters.

The Bench

A MODERN SUITE OVER A DECADE-MATURE PRACTICE.

The productization is modern. The examiner practice underneath is more than a decade old.

Recognized globally by industry leaders, including Chambers, Gartner, IDC, and Legaltech News.

Trusted by Fortune 500 and Am Law 100 clients.

Forensic, eDiscovery, and cyber under one delivery organization.

Scoping

HOW WE SCOPE MEDAL FOR YOUR MATTER.

Understand the Matter

We start with the matter: device count, timeline, and where the evidence has to land.

1

Map the Right Tier

We map the right tier, from a fast Vanguard triage to a Relay pipeline into Relativity.

2

Confirm the Plan

We define the deployment and the custody plan, confirmed at intake.

3

Next Steps

A SHORT PATH TO DEFENSIBLE MOBILE EVIDENCE.

01

A scoping conversation about your matter and your device population.

02

A sized engagement at the tier that fits.

03

The ask: a follow-up working session with your team.

MEDAL. Acquire it. Analyze it. Testify to it.

OPEN FLOOR

MEDAL. Acquire it. Analyze it. Testify to it.

PRESENTER

John Wilson

ROLE

Chief Information Security Officer and
President of Forensics, HaystackID
